DESCRIPTION OF ACCIDENT

(Brief narrative of accident. Include statement of responsibility and recommendations for action to prevent repetition)

The pilot of this aircraft, Lt Turner, taxied out of his hardstand behind the lead aircraft of his element, intending to take his place behind the number two aircraft. He failed to see the number two aircraft as it started to pull on to the perimeter track and collided with it.

Lt Turner had been unable to dry his windshield off completely before starting to taxi. This and the fact that he was taxiing towards the sun made his visibility poor. He failed to check the position of the aircraft he was to follow out and was looking for it farther around the perimeter track. Under these conditions Lt Turner failed to see the other aircraft.

All pilots have been throughly briefed on correct taxi procedures and instructed to use extreme caution when it is impossible to keep the windshields completely free of moisture and condensation.

DESCRIPTION OF ACCIDENT

(Brief narrative of accident. Include statement of responsibility and recommendations for action to prevent repetition)

The pilot of this aircraft, Lt Sutton, started to taxi from the hardstand to take his correct position in the formation. The formation was taxiing from left to right past this hardstand and as Lt Sutton started moving he noticed that aircraft number 139185 in the hardstand to his left was also taxiing out. When he approached the perimeter track Lt Sutton saw that number 139185 was not going to stop and he immediately brought his aircraft to a stop. The pilot of aircraft number 139185 never saw Lt Suttons aircraft until after the collission.

The responsibility of the accident does not rest with Lt Sutton as he was taxiing out to the perimeter track into his proper position, thinking that aircraft number 139185 would take its proper position behind him.

All pilots have been indoctrinated with the necessity for using extreme caution while taxiing.

12 September 1944.

SUBJECT: Report on the Taxi Accident of the A-26s

TO : Commanding Officer, 386th Bombardment Group (M) AAF APO #140, U. S. ARMY

- 1. I was in ship number 1962 As the lead ship of the element in which I was to fly the two position taxied by, I looked to my left to see if I were clear. At the time I was, although, there was another ship starting out of the hardstand to my left. The ground crew cleared me to start out; as I came to the edge of the perimeter track, I looked to my left again and saw this other ship coming down the track quite rapidly. I stopped immediately.
- 2. The pilot of the other ship apparently did not see my ship, as he continued on the track at which time the accident occurred.
- 3. My ship was pulled approximately one or two yards out on to the track as a result of the accident and the other pilot managed to stop his ship in the entrance of the next hardstand to my right.
 - 4. Those are the details of the accident as I saw them.

12 September 1944

SUBJECT: Report on the taxi Accident of the A-26s

TO : Commanding Officer, 386th Bombardment Group (M) AAF
APO #140 U. S. ARMY

l. After leaving my parking area in ship # 99.85 and being out on the taxi strip I made contact with ship # 9190 as he was comming out of his area. Having bleaned my wind shield twice. I was still unable to see out of it when looking into the sun. The other ship being between me and the sun I was unable to see him until after contact was made.

- 2. Ship # 9190 had come to a standstill when we hit. At this time I cleared the track as soon as possible and cut engines.
 - 3. Above is the accident as I saw it.
