Collection Summary

Title: World War II military intelligence map collection: declassified maps and reports from the American, British, and German militaries

Span Dates: 1931-1945

Call No.: G3201.S7 coll .G7

Creator: United States. National Imagery and Mapping Agency

Extent: 21,231 items

Extent: 281 containers

Extent: 9 boxes

Language: Collection material in English and German.

Location: Geography and Map Division, Library of Congress, Washington, D.C.

LC Catalog record: <https://lccn.loc.gov/2014591000>

Summary: Compiled by the National Imagery and Mapping Agency, the collection consists of 21,231 maps, charts, photographs, photo-maps, diagrams, illustrations, and supporting documents organized into 281 reports/containers. The materials were used by the Americans, British, and Germans to plan military operations during World War II. All items are declassified. The folders/containers are housed in nine banker's boxes.

Selected Search Terms

The following terms have been used to index the description of this collection in the LC Catalog. They are grouped by name of person or organization, by subject or location, and by occupation and listed alphabetically.

Organizations

Germany. Heer. Abteilung für Kriegskarten- und Vermessungswesen, cartographer.

Great Britain. Inter-service Topographical Department, cartographer.

Great Britain. War Office. General Staff. Geographical Section, cartographer.

United States. Army Map Service, cartographer.

United States. National Imagery and Mapping Agency, compiler.

Subjects

World War, 1939-1945--Maps.

World War, 1939-1945--Military Intelligence--Germany--Maps.

World War, 1939-1945--Military Intelligence--Great Britain--Maps.

World War, 1939-1945--Military Intelligence--United States--Maps.

Form/Genre

Maps.

Provenance

The collection was donated by the National Imagery Mapping Agency that is now known as the Geospatial Intelligence Agency. German-language materials were seized by victorious Allied forces during and after World War II.

Processing History

The collection was inventoried by volunteer Herb Gilder in 2009. Ryan Moore described the materials and made minor changes to the arrangement in 2014.

Copyright Status

The status of copyright of the collection is governed by the Copyright Law of the United States (Title 17, U.S.C.).

Access and Restrictions

The collection is open to research. Researchers are advised to contact the Geography and Map Reading Room prior to visiting. Many collections are stored off-site and advance notice is needed to retrieve these items for research use.

Preferred Citation

Researchers wishing to cite this collection should include the following information: Container number, World War II military intelligence map collection: declassified maps and reports from the American, British, and German militaries, Geography and Map Division, Library of Congress, Washington, D.C.

Scope and Content Note

The collection consists of 21,231 maps and related materials used for planning military operations during World War II.

Arrangement of the Collection

The three series are arranged by country of origin, Great Britain, the United States, and Germany, and the report/container numbers are not always sequential. Select folders have more than one title and are indicated by number then letter, for example 13a and 13b.

- [Series I](#), Great Britain: Geographical Section, General Staff (GSGS) of the War Office and Inter-Service Topographical Department (ISTD)
- [Series II](#), United States: Army Map Service (AMS)
- [Series III](#), Germany: Generalstab des Heeres, Abteilung fuer Kriegskarten und Vermessungswesen (IV. Mil-Geo)

Description of Series

Container	Series
Series I	<p><u>Great Britain: Geographical Section, General Staff (GSGS) of the War Office and Inter-Service Topographical Department (ISTD.)</u></p> <p>The series contains 183 reports/containers with 11,385 maps, charts, photo-maps, photographs, diagrams, and supporting documents organized alphabetically by country. European and Asian theaters of operation are represented.</p>
Series II	<p><u>United States: Army Map Service (AMS)</u></p> <p>The series contains 11 reports/containers with 574 maps, charts, photo-maps, photographs, diagrams, and supporting documents organized alphabetically by country. The materials are a mixture of translated Russian and German documents, as well as a number of gazetteers for islands in the Pacific.</p>
Series III	<p><u>Germany: Generalstab des Heeres, Abteilung fuer Kriegskarten und Vermessungswesen (IV. Mil-Geo)</u></p> <p>The series contains 88 reports/containers with 9,272 maps, charts, photo-maps, photographs, diagrams, and supporting documents organized alphabetically by country. The materials are in German. Maps of the Western European, African, and Russian fronts are represented.</p>

Container List

Container	Contents
Series I	<p>Great Britain: Geographical Section, General Staff (GSGS) of the War Office and Inter-Service Topographical Department (ISTD.)</p> <p>The GSGS, also known as MI 4, operated under the Director of Military Operations and Intelligence. Its role was to supply maps to the British forces, collect data on foreign survey networks, provide training, and prepare survey data for British Expeditionary Force mobilization. GSGS was organized into small sections, each of which specialized in maps of a particular region. The War Office Map Library, which was also part of MI 4, acquired maps and cartographic intelligence data. Senior staff members were usually Royal Engineer officers with surveying qualifications, although there were a few Royal Artillery or infantry officers. The rest of the staff were civil technical assistants and clerks, together with some other Royal Engineer ranks.</p> <p>The ISTD was formed following the nearly disastrous British invasion of Norway (April 9 - May 9, 1940). Prior to that time, the Army and Royal Navy had different intelligence units that were independent of each other. The ISTD was established at Manchester College, Oxford. Working together with members of each arm and the Allies, this unit was able to bring together zero-elevation aerial photography, which is photography taken as close to the wave tops as possible, in order to bring the views of the beach landscape, which were then made into continuous horizontal strip photographs. These files were marked with military targets such as bridges, marshalling yards and the like, and new photos and intelligence were used to update obsolete maps. From these new maps, and from older maps, magazine illustrations, and old family photographs taken on holiday collected from the public, new maps were produced for the planning staffs and operations forces.</p> <p>The series contains 183 reports/containers with 11,385 maps, charts, photo-maps, photographs, diagrams, and supporting documents organized alphabetically by country. European and Asian theaters of operation are represented.</p>

Series II	<p>United States: Army Map Service (AMS)</p> <p>The Army Map Service of the U.S. Army Corps of Engineers was the premier map-making agency of the U.S. Department of Defense, which prior to 1949 was known as the Department of War. From 1941 to 1968, the major task of the Army Map Service was the compilation, publication, and distribution of military topographic maps and related products required by the Armed Forces of the United States.</p> <p>From 1941 to 1945, the Army Map Service prepared 40,000 maps of all types, covering 400,000 square miles of the earth's surface. More than 500 million copies were produced during the war. The North African Campaign alone required 1,000 different maps with a total of 10 million copies. The Normandy invasion required 3,000 different maps with a total of 70 million copies. Similar commitments were filled for the Pacific and Far East operations.</p> <p>The series contains 11 reports/containers with 574 maps, charts, photo-maps, photographs, diagrams, and supporting documents organized alphabetically by country. The materials are a mixture of translated Russian and German documents, as well as a number of gazetteers for islands in the Pacific.</p>

Series III	Germany: Generalstab des Heeres, Abteilung fuer Kriegskarten und Vermessungswesen (IV. Mil-Geo) <p>The military geographic unit comprised Group IV of the Military Mapping and Survey agency of the German Army. Working from a large central office in Berlin and in satellite offices in occupied territories, mapmakers supported the work of military planners. The mapping units were tasked with producing handbooks and maps of occupied territories and areas where the Germans intended to invade. As the Germans adopted a defensive posture, handbooks, and maps were made of French and Italian coast regions, where the Germans anticipated they would have to repel Allied landings. The unit reached its peak output in 1943 with some 102 volumes that covered 39 areas. Some 240 specialty maps were produced, as well.</p> <p>The series contains 88 reports/containers with 9,272 maps, charts, photo-maps, photographs, diagrams, and supporting documents organized alphabetically by country. The materials are in German. Maps of the Western European, African, and Russian fronts are represented.</p>
